

EMEVI NEEFINANCE

Whitepaper

www.emevinefinance.com

Mission statement

Our goal is to provide an all-in-one platform with simple tools to help investors find all of the services they require. This includes online purchasing, digital art exhibitions, trades, crypto exchange, staking, and other activities that are completely risk-free.

Vision Statement

Our goal is to become the most sought-after DeFi token in the crypto space. As a result, we're concentrating on ensuring to build a strong community and that our market capitalization continues to rise.

INTRODUCTION

EmevineFinance is a decentralized finance with a strategic buyback. With our Mall, NFT Marketplace, Exchange, and other features, we will revolutionize the crypto ecosystem.

EmevineFinance is a DeFi system with a focus on E-commerce, NFT, and Exchange. EmevineFinance offers a more personalized and interactive online purchasing experience, as well as cryptocurrency trading and exchange.

Users can trade physical and digital goods on EmevineFinance's E-commerce platform. Users can also mint, purchase, and sell NFTs on the platform's NFT marketplace.

Customers will be able to see which NFT collections have been validated, ensuring that the collections they are purchasing are genuine. Following that, you'll be able to display your collection in one of EmevineFinance's numerous galleries.

EmevineFinance is a fantastic technology because it is built on different blockchains. As a result, investors will have a wide range of blockchains to choose from. This feature provides a beneficial user experience by allowing everyone to transact using their favorite blockchain.

EmevineFinance native cryptocurrency is Emevine (VINE), which is used to maintain and operate the company's platform.

Electronic commerce, sometimes known as online commerce, is the buying and selling of products and services through the internet, as well as the financial and data transfers required to execute these transactions.

E-commerce is most commonly used to refer to the online sale of physical things, but it can also refer to any sort of online commercial transaction.

WHAT IS E-COMMERCE?

On August 11, 1994, Dan Kohn used his website NetMarket, an American retail platform, to sell a CD by the band Sting "Ten Summoner's Tales" to a friend in Philadelphia, marking the first ever online transaction.

This is the first time a customer has purchased a product via the internet, or "e-commerce," as it is now known. Since then, ecommerce has advanced to make it easier to locate and purchase items through online stores and marketplaces.

Since the World Health Organization declared the covid-19 pandemic, there seemed to have been a surge in everything. On the other hand, one of the many factors that has been continuously declining is monthly retail sales volume.

In reality, covid-19 caused a 5.1 percent drop in retail sales in the United Kingdom, according to the Office for National Statistics. Since the virus's inception almost 30 years ago, this is the biggest decline ever reported.

WHAT IS E-COMMERCE?

By 2040, it is expected that 95 percent of purchases would be made online. Online purchasing is getting more popular among consumers.

Users can trade physical and digital goods on EmevineFinance's Ecommerce platform. Users can also mint, purchase, and sell NFTs on the platform's NFT marketplace.

Customers will be able to see which NFT collections have been validated, ensuring that the collections they are purchasing are genuine. Following that, you'll be able to display your collection in one of EmevineFinance's numerous galleries.

EMEVI MULTI-VENDOR E-COMMERCE

EmevineFinance e-commerce is a decentralized platform that allows two individuals to engage directly with each other without the need for a third-party intermediary. Through the peer-to-peer (P2P) service, the buyer and seller deals directly with one another.

It also, provides sellers the opportunity to own an online store for free and is a marketplace that allows them sell their wares from a single storefront, thereby speeding up sales and growth.

In comparison to typical banking systems, EmevineFinance charges lower transaction fees.

Customers can also purchase things without exposing their personal information, allowing you to conduct business without risk of losing credit cards, Social Security numbers, or other sensitive data.

Customers at EmevineFinance e-commerce have a variety of options for that one good from several merchants.

EMEVI NEFINANCE
E-COMMERCE
UNIQUE
FEATURE

An NFT is a digital asset that represents real-world objects like art, collectibles, virtual avatars, GIFs, music, in-game items and videos. They are bought and sold online, frequently with cryptocurrency, and they are generally encoded with the same underlying software as many cryptocurrencies.

Despite the fact that they've been there since 2014, NFTs are gaining popularity currently as a popular means to buy and sell digital artwork.

WHAT IS NON- FUNGIBLE TOKEN (NFT)?

The NFT market is experiencing a surge in interest, as seen by the increased sales volume. NFT sales volume increased to \$2.5 billion in the first half of 2021, up from \$13.7 million in the same period of 2020.

NFTs exist on a blockchain, which is a distributed public ledger that records transactions. An NFT is created, or “minted” from digital objects that represent both tangible and intangible items.

EMEVINE NFT MARKETPLACE'S UNIQUE FEATURE

EmevineFinance is both a marketplace for content creators bespoke crypto assets, such as digital artists and model creators, and a distributed network built on various blockchains that allows them to trade without the use of a middleman.

Creators must convert their work into NFTs by filling out a form on the website and submitting images as well as other information such as a listing price.

Most NFT websites tend to focus on a single field, but this platform covers a wide range of topics. NFTs on the EmevineFinance NFT Marketplace include digital artworks, music, and utility tokens.

Young digital artists' works will be promoted weekly in order to raise awareness and bring their creativity to limelight.

AUCTION

On the EmevineFinance NFT Marketplace, items can be auctioned. For example, suppose you've recently completed a highly valuable digital painting and want to sell it as NFT.

Others can view it and take pictures of it, but it is of no value to them because it does not prove ownership of the painting. The "ownership" is authenticated by the network, which solves the underlying NFT problem.

You then upload it to the EmevineFinance platform, which can generate NFTs. Your work is now linked to a smart contract's address and tradeable.

On the floor, you can bid and be auctioned. To list it on the NFT exchange, you'll have to pay a modest charge. Anyone who accepts to buy your work is assuming ownership of it.

EmevineFinance gives authors the option of setting a royalty percentage on their work. It means that if the artwork is sold to others, they are entitled to a set part of the sale price. For example, if a piece of digital art has a 5% royalty indicated on it, the artist will receive 5% of each subsequent sale of that artwork.

ROYALTY

A service fee of VINE tokens is charged when a product is created from the minting of an NFT. On the EmevineFinance NFT marketplace, buyers and sellers may transact collectibles with almost negligible costs.

FEE

DECENTRALIZED EXCHANGE

The main goal of EmevineFinance DEX is to establish a cutting-edge platform that combines the advantages of centralized and decentralized exchanges.

EmevineFinance DEX is a decentralized exchange that is built on many blockchains. It is intended to provide all of the benefits of a distributed platform, as well as a user-friendly interface and liquidity on par with centralized exchanges.

EmevineFinance DEX is also developing a DEX aggregator to provide traders with the best adjusted price, making it simple to purchase and sell assets at the best possible price across all DEX liquidity sources.

DECENTRALIZED EXCHANGE

EmevineFinance's major goal is to provide a fully decentralized platform for exchanging tokens in a trustless peer-to-peer ecosystem, with high liquidity, lightning-fast transaction speeds, and advanced features including protection from both front-running and bot intervention during IDO launches.

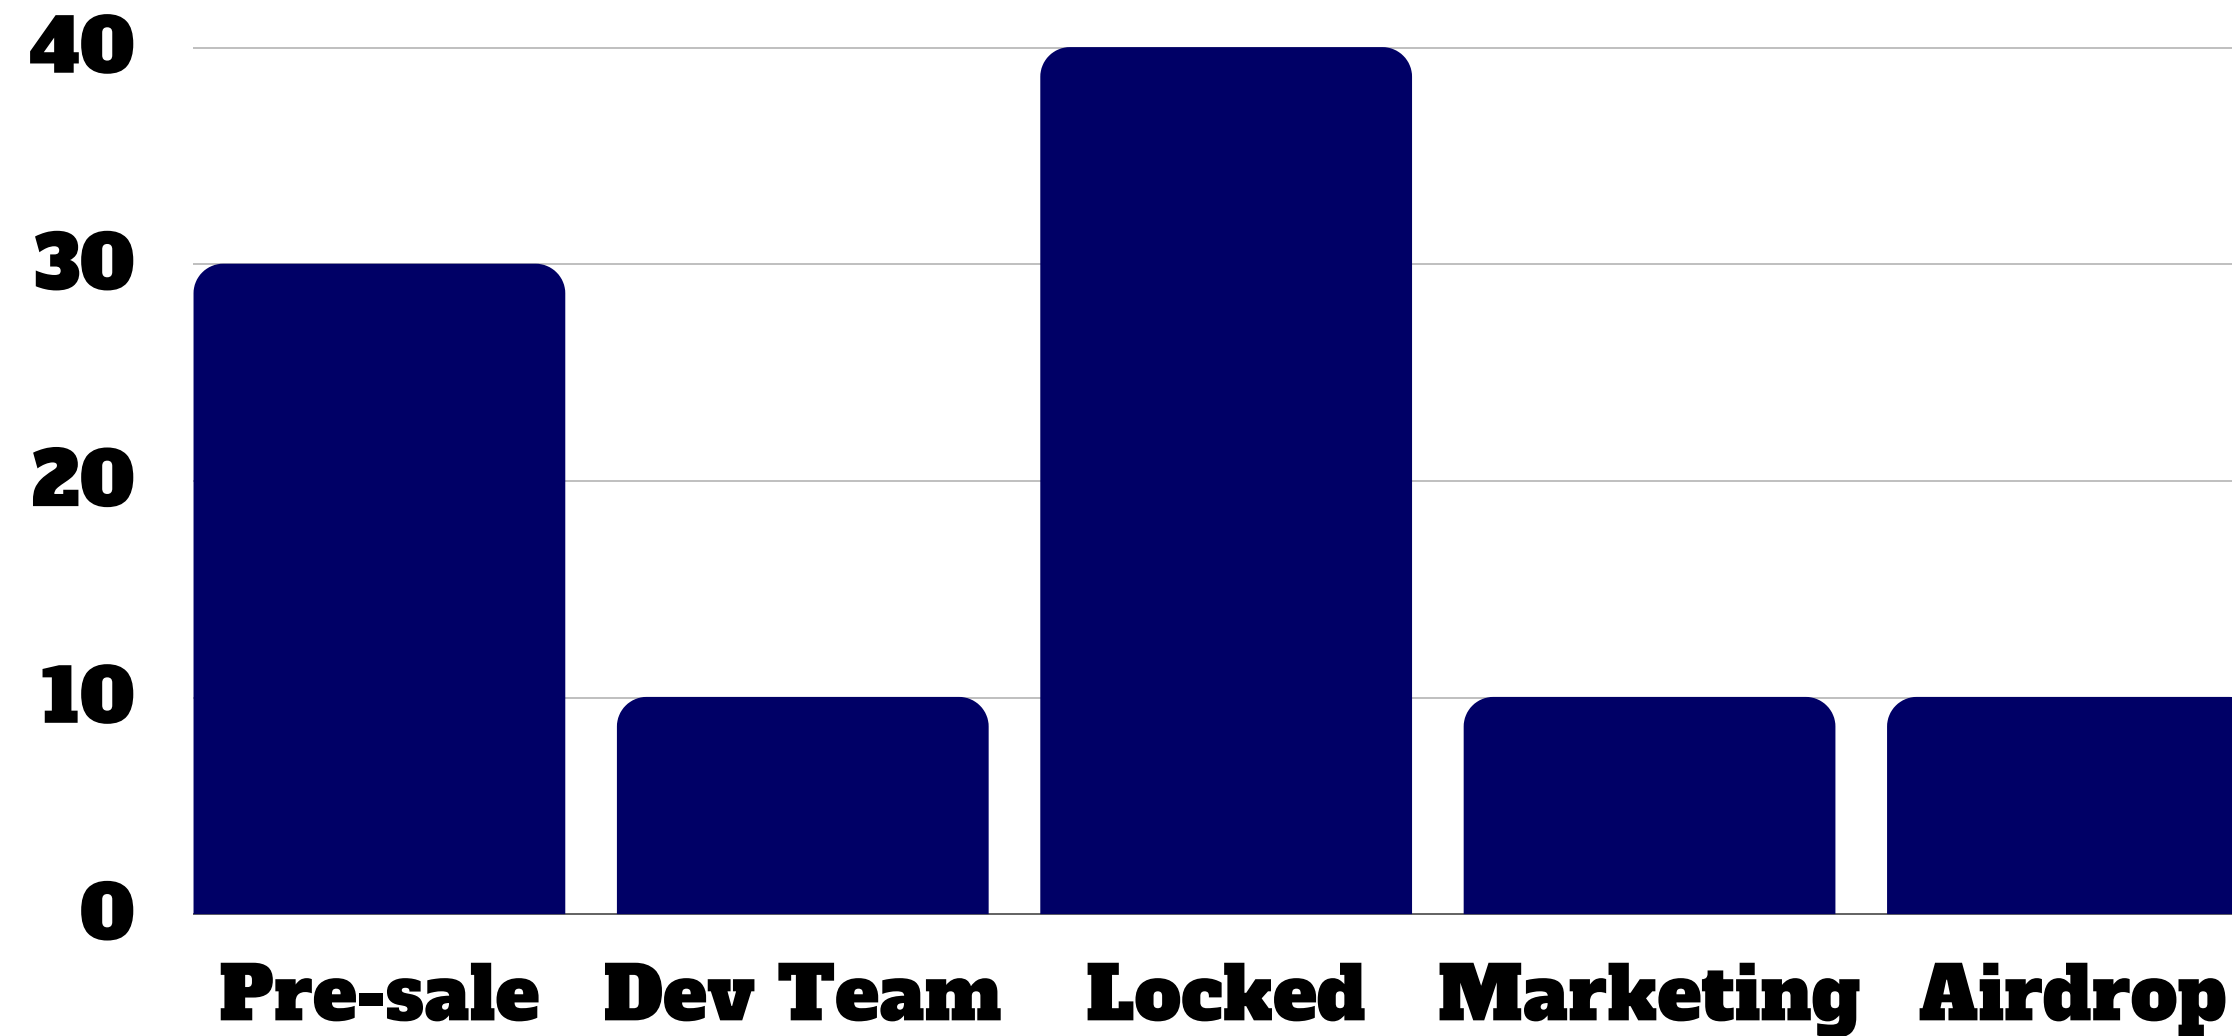

We believe in the ability of DeFi to bring financial independence to individuals all over the world at EmevineFinance DEX.

We're working hard to make our platform as user-friendly as possible for our crypto beginners.

By focusing on the user experience and building interoperable bridges to various liquidity sources, including fiat support, we are lowering the hurdles to entry. EmevineFinance DEX aspires to be the most user-friendly platform for purchasing, storing, and trading crypto assets.

TOKENOMICS

TOTAL SUPPLY: 10,000,000

VINEMAP

PHASE 1

- Website Development
- Community Building
- Marketing
- Airdrop
- Community contribution & promotion contests

PHASE 2

- Vine army shilling and promotions.
- Pre-sale
- 80% Liquidity locked for 3years
- Partnerships & Collaborations
- Listing on DEX
- E-commerce (Multi-Vendor Store)

VINEMAP

PHASE 3

- CoinGecko
- CoinMarketCap
- CEX Listing
- Influencer Marketing
- NFT Marketplace

PHASE 4

- Audits
- EmevineFinance DEX
- VinePool and VineFarm
- Airdrop Distribution
- Blockchain
- Wallet Development

APPLICATION OF FUNDS RAISED

The funds raised will be used in the following ways:

- **Marketing:** Hiring social media influencers, digital advertising, and real world promotions.
- **Exchange listings:** Increase our listings on new exchanges in order to reach new audiences.
- **Project Development:** Putting our Vinemap into action while also expanding the EmevineFinance ecosystem.

We invite you to join us in building the world's largest DeFi project.
